

The PropSpeed System

Propstrip

Remove old PropSpeed the easy way. Let Propstrip do the hard work for you and cut labor costs by up to 70%.

SKU #PRST1000

Etching Primer Base & Hardener

Known for its tenacious adhesion and superior corrosion resistance, PropSpeed's Etching Primer is one of the best on the market.

SKU #782BC

Propclean

Get your metal surface completely contaminant-free and ready for Propprep with Propclean alcohol wipes.

SKU #PCW10

Propprep

Prepare your metal for the Etching Primer with this critical step, featuring a low phosphoric acid percentage.

SKU #PPW10
SKU #784-500
SKU #784-1LTR

Clear Coat

Our slick, nontoxic topcoat repels marine growth to help reduce boat-owning costs. More speed, less fuel!

SKU #782D

Stirring Wheels

Our Paint Stirring Wheels provide a simple, practical way to ensure the Etching Primer Base & Hardener are perfectly mixed.

SKU #OMS1200

Ensure maximum adhesion between your PropSpeed coating and metal substrate with the components of our proprietary system. Applied correctly, from preparation to finish, PropSpeed is effective on:

Propellers | Rudders | Shafts | Struts | Trim Tabs | IPS Drives | Thrusters | Keel Coolers | Any Underwater Metal Surface
