ALL-IN-ONE PROTECTION

Defence against marine growth & corrosion for all underwater metal assets.

SUPERIOR ADHESION TO METAL

Strong long-lasting adhesion to metals that makes PropSpeed unparalleled to other products on the market.

OPERATIONAL READINESS

PropSpeed keeps underwater metals free from marine growth, ensuring that your vessel can run at its peak throughout the entire season.

REDUCE COST AND SAVE FUEL

Our super slick coating system saves time and money through increased efficiency and reduced maintenance costs.

STOP THE TRANSFER OF INVASIVE SPECIES

Growth releases when the vessel reaches cruising speed, preventing invasive species from being transferred to other regions.

“Before using PropSpeed, we had as much as 4 inches (10cm) of growth on the propeller shaft. With PropSpeed applied, our running gear is now free of growth.”
– Captain Rick Gauron, Ferry - Yankee Freedom III, Florida
